SECTION II – RISK FACTORS

An investment in Equity Shares involves a high degree of financial risk. Investors should carefully consider all information in this Draft Prospectus, including the risks described below, before making an investment in our Equity Shares. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could suffer, the price of the Equity Shares could decline, and you may lose all or part of your investment. In making an investment decision, prospective investors must rely on their own examination of us and the terms of the Issue including the merits and risks involved. Investors should consult their tax, financial and legal advisors about particular consequences to them of an investment in the Issue. The risk factors set forth below do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, such financial impact cannot be disclosed in such risk factors. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Any of the following risks, as well as the other risks and uncertainties discussed in this Draft Prospectus, could have a material adverse effect on our business and could cause the trading price of our Equity Shares to decline and you may lose all or part of your investment.

This Draft Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. See chapter titled “Forward-Looking Statements” beginning on page 15.

To obtain a better understanding of our business, you should read this chapter in conjunction with other chapters of this Draft Prospectus, including the chapters titled “Our Business”, Management’s Discussion and Analysis of Financial Condition and Results of Operations”, “Industry Overview” and “Restated Financial Statements” on page 82, 162, 75 and 120 respectively of this Draft Prospectus, together with all other Restated Financial Statements contained in this Draft Prospectus. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus.

Unless otherwise stated, the financial data in this chapter is derived from our Restated Financial Statements for the years ended March 31, 2021 as included in “Restated Financial Statements” on page 120 of this Draft Prospectus.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may have material impact quantitatively;
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material individually but may be found material collectively.
4. Some events may not be material at present but may be having material impact in future.

BUSINESS RELATED RISKS

- 1. *We are dependent on our ability to develop new services and products, and enhance our existing services and products. If our products and services do not gain market acceptance, our operating results may be negatively affected.***

Rapid technological advances, changing delivery models and evolving standards in software development and maintenance, increasing customer needs, frequent new product introductions and enhancements characterize the industry in which we operate. Digitization is driving major changes in the global business software market, with IT leaders looking to adopt new technologies and software platforms to meet business needs, including revenue growth driven through new products and services, better customer experience and delivery mechanisms, and growth in revenue and profits. Our success depends upon our ability to anticipate, design, develop, test, market and support new software products, services, and enhancements of current products and services in response to evolving industry requirements.

To effectively meet customer demand, it is important that we continue to enhance our products and service offerings. The markets for our offerings are rapidly evolving due to which the level of acceptance of such products and services is not certain.

If we are unable to develop new or sufficiently differentiated products and services, enhance our product offerings and support services in a timely manner or position and price our products and services to meet demand including in response to new industry standards, it may have an adverse impact on our business.

If the markets for our services fail to develop, develop slower than expected or experience increased competition, our business may suffer. As a result, we may be unable to successfully market our existing services and products, develop and successfully launch new products and services and enhancements to existing products and services, complete customer implementations on a timely basis, or complete products and services currently under development. If our services are not accepted by our customers, our business, operating results and financial condition will be materially adversely affected. For further details regarding our business, please refer to chapter titled “*Our Business*” beginning on page 82 of this Draft Prospectus.

2. *The length of our sales cycle may fluctuate significantly and depends on several external factors which may result in significant fluctuations in our revenues.*

A customer's decision to purchase our services or products often involves a comprehensive implementation process across the customer's network(s) which includes customer education, evaluation by a number of employees in our customers' organisation and, often, a significant strategic or operational decision by our customers. Our sales efforts involve educating our customers about the use and benefits of our products and solutions, including any potential cost savings achievable by organisation that partner with us.

Customers typically undertake a significantly long evaluation process which also involves evaluation of our competitors' services and can result in a lengthy sales cycle. Moreover, a purchase decision by a potential customer typically requires extended evaluation, testing and the approval of senior decision makers, including the boards of directors of our customers. We spend substantial time, effort and money on our sales efforts without any assurance that our efforts will produce any sales. Additionally, implementing our products and any related services may entail a significant commitment of resources by prospective customers, accompanied by the risks and delays frequently associated with significant technology implementation projects. Such delays and fluctuations could cause our revenues and results of operation to fluctuate significantly across time periods, and we may not be able to adjust our costs quickly enough to offset such lower revenues, potentially adversely impacting our business, operating results and financial condition.

3. *There can be a potential conflict of interest owing to similar line of business between our Company, our Subsidiary Company and Group Company.*

Our Subsidiary Company i.e. Infinitybeam IOT Labs Private Limited and our Group Company i.e. Wherrelz Corporation have some of the objects similar to that of our Company's business. Our Company along with our Subsidiary Company and Our Group Company are into the business of software development and maintenance. Some of our directors are on the board of directors of our Subsidiary Company and Group Company, and have equity interest or investments in our Subsidiary Company and our Group Company that may offer services that are related to our business. As a result, a conflict of interest may arise in addressing business opportunities and strategies and implementing new plans.

Further, we have not entered into any non-compete agreement with any of the said entity. We cannot assure that our Promoters who have common interest in said entity will not favour the interest of that entity. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company, our Subsidiary Company, our Group Company and our Promoter Group Entity in circumstances where our respective interests' conflict. There can be no assurance that our Promoters or our Subsidiary Company or our Group Company will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours or they will not float any new company. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition. For details regarding our Subsidiary Company and Group Company, please see chapter titled “*History and Certain Corporate Matters*”, “*Our Group Company*” and “*Our Promoters and Promoter Group*”, beginning on page 98, 117 and 113 of this Draft Prospectus.

4. *The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted.*

The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted. In late calendar 2019, COVID-19, commonly known as “novel coronavirus” was first reported in Wuhan, China. Since then, the virus has progressively spread globally too many countries. The World Health Organization declared the COVID-19 outbreak as a health emergency of international concern on January 30, 2020 and thereafter categorized the outbreak as a pandemic on March 11, 2020. In order to contain the spread of COVID-19 virus, the Government of India initially announced a 21-day lockdown on March 24, 2020, which, after being subject to successive extensions, is being relaxed currently. During the duration of the lockdown, there were several restrictions in place including travel restrictions and directive to all citizens to not move out of their respective houses unless

essential. Whilst the lockdown required private, commercial and industrial establishments to remain closed, manufacturing units of essential commodities were permitted to be functional. The team members have been working from home during lockdown and have been able to execute their responsibilities and service clients without any disruption, difficulty or delay. Due to the rising number of infected cases of COVID-19 in the country, there is no certainty if additional restrictions will be put back in place or if another lockdown would be re-imposed to control the spread of the pandemic. We cannot assure you that we may not face any difficulty in our operations due to such restrictions and such a prolonged instance of lockdown may adversely affect our business, financial condition and results of operations. Further, our ability to ensure the safety of our workforce and continuity of operations while confirming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees contract COVID-19, we may be required to quarantine our employees and shut down a part of or the entire operating facility as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, loss of life, injuries and impact the wellbeing of our employees. The ultimate impact will depend on a number of factors, many of which are outside our control. These factors include the duration, severity and scope of the pandemic, the impact of the pandemic on economic activity in India and globally, the eventual level of infections in India, and the impact of any actions taken by governmental bodies or health organisation (whether mandatory or advisory) to combat the spread of the virus. These risks could have an adverse effect on our business, results of operations, cash flows and financial condition. To the extent that the COVID19 pandemic adversely affects our business and operations, it may also have the effect of heightening many of the other risks described in this “Risk Factors” chapter.

5. *We may become liable to our customers and lose customers if we have defects or disruptions in our service or if we provide poor service. We may also be liable in the event of misuse of our services or platforms.*

We deliver technology as a service, and errors or defects in the software applications underlying our services, or a failure of our hosting infrastructure, may make our services unavailable to our customers. Majority of our contracts or service agreements involve projects that are critical to the operations of our clients’ businesses. Any failure in a client’s system and any direct damages, expenses, costs, obligations could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Any errors, defects, disruptions in service or other performance problems with our services, whether in connection with the day-to-day operation of our services, upgrades or otherwise, could damage our customers’ businesses.

If we have any errors, defects, disruptions in service or other performance problems with our services, our customers could elect not to renew our contract, or delay or withhold payments to us and we could lose future sales. Further, our customers may make claims against us, which could result in an increase in our provision for doubtful accounts, an increase in collection cycles for accounts receivable or litigation costs. We may in the future, experience, misuse of our services or platforms. The occurrence of any such events in the future could lead to user dissatisfaction and discourage the use of our products and services. Such events may also give rise to complaints and actions against us. All these factors could adversely affect our business and results of operation.

6. *Our Registered Office is owned by our Promoter and he has given us an NoC to use the same. Any revocation of such NoC could hamper our business operations.*

We do not own our registered office at Plot No. 15, Road 10, Sec -1 New Panvel East, Navi Mumbai, Raigarh – 410206, Maharashtra and the same is owned by our Promoter, Mr. Chaitanya Dhareshwar. The Company has not entered into an agreement with the Promoter to use the premises as our Registered Office. Our Promoter Mr Chaitanya Dhareshwar has given premise on rent free basis. In the event our promoter revokes the NOC, we may be required to vacate our office and identify alternative premises. Such a situation could result in loss of business and may adversely affect our operations and profitability.

Further, if we are required to relocate our registered office as a result of revocation of the NoC from the Promoter, we may incur additional cost as a result of such relocation. We may have to acquire or rent new office, which may be not be available within our desired price range, location or convenience or at all. Acquiring any new place will entail costs pertaining to deposits, rents, registration, etc. and the same may adversely affect our profitability. Any failure or difficulty faced by us continuing the lease agreement may affect our business and its prospects. For further details of our properties, please refer to chapter titled “Our Business” beginning on page 82 of this Draft Prospectus.

7. *Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us.*

Our success also depends on our key managerial personnel and our ability to attract and retain them. Any loss of our key person could adversely affect our business, operations and financial condition. The success of our business operations is attributable to our Promoters, Directors and the technical team. We believe that our relation with our Promoters, who have rich experience in markets, managing customers and handling overall businesses, has enabled

us to experience growth and profitability. Our Promoters have been actively involved in the day-to-day operations and management since the incorporation of the Company. Further, our Promoters have also promoted other companies/ firms/ ventures and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

We also depend significantly on the expertise, experience and continued efforts of our technical team; hence, our performance and success substantially depend on the ability to attract and retain our key employees, including our management team and experienced personnel. There can be no assurance that any member of our senior management or other experienced personnel will not leave us in the future. The lack of or loss of the services of such key persons in the organization could seriously impair our ability to continue to manage and expand our business. Our success is also dependent on our continuous ability to identify, hire, train retain and motivate R&D team, technical team, servicing team and sales and marketing personnel. Competition for personnel in our industry is intense, and the availability of suitable and qualified candidates is limited. If we fail to hire and retain our employees, the loss of their services could harm our business operations and financial condition could be adversely affected.

8. Any negative cash flows in the future would adversely affect our cash flow requirements, which may adversely affect our ability to operate our business and implement our growth plans, thereby affecting our financial condition.

As per our Restated Consolidated Financial Information, our cash flows from operating, investing and financing activities are as set out below:

(Rs. in lakhs)

Particulars	Financial Year		
	2021	2020	2019
Net Cash Generated from Operating Activities	2.67	0.30	1.63
Net Cash Generated from Investing Activities	(1.50)	(1.10)	(0.89)
Net Cash Generated from Financing Activities	(0.16)	0.59	(3.29)

For details, please see chapter titled “*Management’s Discussion and Analysis of Financial Conditions and Results of Operations*” beginning on page 162 of this Draft Prospectus.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources.

If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

9. We have issued Equity Shares during the last one year at a price below the Issue Price

During the last one year we have issued Equity Shares at a price lower than the Issue Price. For further details, see “Capital Structure” on page 54. The prices at which Equity Shares have been issued by us in last one year should not be taken to be indicative of the Issue Price and the trading price of our Equity Shares after listing

10. Our failure to adapt to technological developments or industry trends could affect the performance and features of our products and services and reduce our attractiveness to our customers.

As our operations grow in scope and size, whether through offering of new services or expansion into new markets, we must continuously improve, upgrade, adapt and expand our systems and infrastructure to offer our customers enhanced services, features and functionality ahead of rapidly evolving customer demands, while maintaining the reliability and integrity of our systems and infrastructure in a cost-efficient and competitive manner. The systems, infrastructure and technologies we currently employ may become obsolete or be unable to support our increased size and scale. Even if we are able to maintain, upgrade or replace our existing systems or innovate or customize and develop new technologies and systems, we may not be as quick or efficient as our competitors in upgrading or replacing our systems. We may be unable to devote adequate financial resources or obtain sufficient financing on commercially acceptable terms in time, or at all, which may have a material adverse effect on our business, prospects, results of operation and financial condition.

Further, we may also not be able to attract talent to continue with the required upgrades and improvements to our systems. Our new systems, infrastructure and technologies may not perform satisfactorily, or be used effectively and we may also fail to adapt our products and services to our increased size and scale, customer requirements or emerging trends and industry standards. Further, there is no assurance that we will be able to downsize and scale back our systems and platforms quickly and efficiently enough to reduce unnecessary costs and expenses in the event

that user demand falls below our expectations. In addition, to effectively manage our growth, we will also need to continue to improve our operational, financial and management controls, and our reporting systems and procedures.

Continued growth increases the challenges involved in, amongst others, continuous training and development of skilled and competent personnel and employees and developing and improving internal administrative infrastructure. These systems, enhancements and improvements will require significant capital expenditures and management resources. Failure to implement these improvements could adversely affect our ability to manage our growth. If we do not effectively manage our growth or appropriately expand and upgrade or downsize and scale back our systems and platforms, as the case may be, in a timely manner or at a reasonable cost, or both, or at all, we may lose market opportunities or damage our attractiveness and reputation with our customers, which may adversely affect our business, financial condition and results of operations.

11. Our business is dependent on developing and maintaining continuing relationships with our clients and customers. The loss of any significant client or customer could have a material adverse effect on our business, financial condition and results of operations.

Although, we generally do not enter into long-term supply contracts with our customers, our business is dependent on developing and maintaining a continuing relationship with our key clients and customers. In the event of a significant decline in the demand for our products or services by our key clients, our business, results of operations and financial condition may be materially and adversely affected. There can be no assurance that we will be able to maintain the historic levels of business from these clients and customers or that we will be able to replace these clients in case we lose any of them.

12. Our Company's insurance coverage may not be adequate to protect us against all material hazards which may result in disruptions of operations/monetary loss on account of stoppage of work.

Our business could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. Currently we do not have any insurance policy for any of our business or assets or properties. Thus, any of the aforementioned losses will not be compensated to any extent. If we are required to take new coverage, there can be no assurance that a suitable coverage will be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims. Presently, if we suffer a large uninsured loss our business, financial condition and results of operations may be adversely affected.

13. We require working capital for our smooth day-to-day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favorable terms may have an adverse effect on our operations, profitability and growth prospects.

Our business demands working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favorable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects.

14. Our Company along with our subsidiary Company have entered into related party transactions in the past and may continue to enter into related party transactions in the future, which may potentially involve conflicts of interest with the equity shareholders.

Our Company along with our subsidiary Company have entered into certain related party transactions with our Promoters, Directors and our Group Company in the past. For details, please see "Annexure I(ii) of Restated Consolidated Statements" under the chapter titled "Restated Financial Statements" beginning on page 120 of this Draft Prospectus. While our Company believes that all such transactions have been conducted on the arm's length basis, there can be no assurance that it could not have been achieved on more favorable terms had such transactions not been entered into with unrelated parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation.

15. Our Directors and promoters of the Company are involved in the Common pursuit with the Company and this may adversely affect the interest of the Company.

Our Directors and promoters Mr. Chaitanya Dhareshwar and Mrs. Sumanlata Dhareshwar are involved in the business similar to that of our Company through M/s. Wherrelz Corporation, a company incorporated in USA. We do not have any non-compete / partnership agreement with the firm or the directors cum promoters, and this may adversely affect the business of our Company in case the Company plans to enter the foreign market in future if our promoters and directors operates the business of the firm on a more favoritisms basis. Also, the first name of the firm "Wherrelz" is exactly similar to the first name of our Company and this may be associated with the adverse /

favorable goodwill of firm may affect the reputation and market of the Company in the even the Company at any time wish to venture in that market in future.

16. *We require certain approvals, NOCs or licenses or registration, permits, in the ordinary course of business and the failure to renew, obtain or retain them in a timely manner, or at all, may affect our operations.*

We require certain statutory and regulatory approvals, licenses, registrations and permissions, and applications need to be made at the appropriate stages for our business to operate. Although we believe that we have obtained required license for carrying our business activity. There can be no assurance that the relevant authorities will renew these approvals or licenses in a timely manner. As a result, we may not be able to execute our business plan as planned. An inability to obtain or maintain approvals or licenses required for our operations may adversely affect our operations. Government approvals, licenses, clearances and consents are often also subject to numerous conditions, some of which are onerous and may require significant expenditure. Further the name of Company is changed from Wherrelz IT Solutions Private Limited to Wherrelz IT Solutions Limited and our licenses are pending for renewal due to change in name of Company. Any problem arises in renewal of the same will affect our business.

Furthermore, approvals, licenses, clearances, and consents covering the same subject matter are often required at State and central Government levels. If we fail to comply, or a regulator claims that we have not complied, with these conditions, we may not be able to commence or continue with work or operate our business activity. For further information on various approvals or licenses required in connection with our operations, please see the chapter entitled “Government and other Key Approvals” beginning on page 173 of this Draft Prospectus.

17. *Our Company has made application for registration of trademark, which is under process of registration. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate.*

We have made an application with ‘The Registrar of Trademarks, Trademarks Registry’ for registration of trademark of our word “WHERRELZ” under class 9 and 42. The registration for the said trademark in our name is important to retain our brand equity. If our application for registration is not accepted or if the oppositions filed against our trademark application if any, are successful, we may lose the statutory protection available to us under the Trademarks Act, 1999 for such trademark. Further, we cannot assure that our pending application would be granted registration or will not be challenged or if granted registration, will not be invalidated or circumvented or will offer us any meaningful protection. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate. For further details of our trademarks, please see chapter titled “Government and other Key Approvals” beginning on page 173 of this Draft Prospectus.

If we are unable to compete successfully, we could lose our customers, which would negatively affect our financial performance and profitability. Moreover, our ability to protect, enforce or utilize our brand is subject to risks, including general litigation risks. We cannot assure you that we will continue to have the uninterrupted use and enjoyment of these trademarks or logos, in the event that we are unable to renew the relevant trademarks upon expiry. Furthermore, we cannot assure you that our brand name will not be adversely affected in the future by actions that are beyond our control, including customer complaints or adverse publicity from any other source. Any damage to our brand name, if not immediately and sufficiently remedied, could have an adverse effect on our business and competitive position.

18. *Interruptions or performance problems associated with our technology and infrastructure may harm our business and results of operations.*

Our continued growth depends in part on the ability of our existing and potential customers to access our solutions at any time. Although there have not been instances in the past where interruptions or problems with our technology and infrastructure have caused performance issues, we may in future experience disruptions, data loss, outages and other performance problems with our technology infrastructure due to a variety of factors, including infrastructure changes, introductions of new functionality, human or software errors, capacity constraints, denial of service attacks or other security-related incidents. In some instances, we may not be able to identify the cause or causes of these performance problems within an acceptable period of time. It may become increasingly difficult to maintain and improve our performance, especially during peak usage times and as our products and websites of our customers become more complex and user traffic increases. If our products and websites of our customers are unavailable or if users of such products and websites are unable to access products and websites within a reasonable amount of time, or at all, our business would also be harmed. Any disruptions in these services, including as a result of actions outside of our control, would significantly impact the continued performance of our products. Any loss of the right to use any of these services could result in decreased functionality of our products until equivalent technology is either developed by us or, if available from another provider, is identified, obtained and integrated into our infrastructure. To the extent that we do not effectively address capacity constraints, upgrade our systems as needed, and continually

develop our technology and network architecture to accommodate actual and anticipated changes in technology, our business, results of operations and financial condition could be harmed.

19. *We continue to explore the diversification of our business and the implementation of new models and services. These diversifications and our other strategic initiatives may not be successful, which may adversely affect our business and results of operations.*

In order to achieve our goal, we are constantly evaluating the possibilities of expanding our business through new models, innovations and/or starting new services. Although we believe that there are synergies between our current business and our expansion plans, we do have experience or expertise in these new areas. These new businesses and modes of delivery and the implementation of our strategic initiatives may pose significant challenges to our administrative, financial and operational resources, and additional risks, including some of which we are not aware of. The early stages and evolving nature of some of our businesses also make it difficult to predict competition and consumer demand therein. Our strategic initiatives require capital and other resources, as well as management attention, which could place a burden on our resources and abilities. In addition, we cannot assure you that we will be successful in implementing any or all of our key strategic initiatives. If we are unable to successfully implement some or all of our key strategic initiatives in an effective and timely manner, or at all, our ability to maintain and improve our leading market position may be negatively impacted, which may have an adverse effect on our business market position, brand name, financial condition and results of operations.

20. *We have a limited operating history and may be subject to risks inherent in early-stage companies, which may make it difficult for you to evaluate our business and prospects.*

Although we were incorporated in 2014, we have a limited operating history upon which you can evaluate our business and prospects. You must consider our business and prospects in light of the risks and difficulties we face as an early-stage company with a limited operating history and should not rely on our past results as an indication of our future performance. In particular, our management may have less experience in implementing our business plan and strategy compared to our more well-established competitors, including our strategy to increase our market share and build our brand name. In addition, we may face challenges in planning and forecasting accurately as a result of our limited historical data and inexperience in implementing and evaluating our business strategies. Our inability to successfully address these risks, difficulties and challenges as a result of our inexperience and limited operating history may have a negative impact on our ability to implement our strategic initiatives, which may have an adverse effect on our business, prospects, financial condition and results of operations.

21. *Significant disruptions in our information technology systems or breaches of data security could adversely affect our business and reputation.*

We may also face cyber threats such as: (i) Phishing and Trojans - targeting our customers, wherein fraudsters send unsolicited codes or mails to our customers seeking account sensitive information or to infect customer machines to search and attempt ex-filtration of account sensitive information; (ii) Hacking – wherein attackers seek to hack into our infrastructure with the primary intention of causing reputational damage to us by disrupting services; (iii) Data theft – This can be internal i.e. by someone who has access to data of our Company or external wherein unconnected cyber criminals may attempt to intrude into our network with the intention of stealing our data or information; and (iv) Advanced persistent threat – a network attack in which an unauthorized person gains access to our network and remains undetected for a long period of time. In the event of a significant decline in the demand for our products, our business, results of operations and financial condition may be materially and adversely affected.

Our systems are potentially vulnerable to data security breaches, whether by our employees, or our service providers or others that may expose sensitive data to unauthorized persons. We process and transfer data, including personal information, financial information and other confidential data provided to us by our clients. Although we maintain systems and procedures to prevent unauthorized access and other security breaches, it is possible that unauthorized individuals could improperly access our systems, or improperly obtain or disclose sensitive data that we process or handle. Data security breaches could lead to the loss of intellectual property or could lead to the public exposure of personal information (including sensitive financial and personal information) of our clients' investors or our employees. Any such security breaches or compromises of technology systems could result in institution of legal proceedings and penalties, which may have an adverse effect on our business and reputation.

22. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial

condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

- 23. *We are dependent on a number of key managerial personnel, including our senior management, and the loss of or our inability to attract or retain such persons with specialized technical know-how could adversely affect our business, results of operations, cash flows and financial condition.***

Our performance depends largely on the efforts and abilities of our senior management and other key managerial personnel, including our present officers who have specialized technical know-how. The inputs and experience of our senior management and key managerial personnel are valuable for the development of our business and operations strategy. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. Our Company does not maintain any director's and officer's insurance policy. The loss of the services of such persons could have an adverse effect on our business, results of operations, cash flows and financial condition. For further details on the senior management and key managerial personnel of our Company, please refer to the chapter titled "*Our Management*" beginning on page 102 of this Draft Prospectus.

- 24. *There are no outstanding legal proceedings by and against involving our Company, Promoters, Directors and Group Companies.***

There are no outstanding legal proceedings by and against involving our Company, Promoters, Directors and Group Companies which are pending at different levels of adjudication before various courts, tribunals, enquiry officers, tax authorities and appellate authorities. For the details, please refer the chapter titled "*Outstanding Litigations and Material Developments*" on page 169 of this Draft Prospectus.

- 25. *We have not entered into any long-term contracts with any of our customers and typically operate on the basis of work orders, which could adversely impact our revenue and profitability.***

We generally do not have any long-term contracts with our customers and we provide services on basis of regular work order with our customers which could adversely affect the business of our company. We cater our services on an order-to-order basis. Our customers can terminate their relationship with us by giving notice and as such terms and conditions as mutually agreed upon, which could materially and adversely impact our business. Although we believe that we have satisfactory business relation with our customers and have received business from them in the past there can be no assurance that we will receive business in future from them and may affect our profitability.

- 26. *Upon completion of the Issue, our Promoters / Promoter Group will not continue to retain significant control in our company after the Issue, which will not allow them to exercise significant control over us. We cannot assure you that our Promoters & Promoter Group will always act in the best interest of the company.***

Upon completion of the Issue, our Promoters and Promoter Group will collectively own [●]% of the total post issue Equity Shares. assuming full subscription of the Issue. Accordingly, the Promoters and the Promoter Group will not be able to continue to exercise significant influence over our business policies and affairs and all matters requiring shareholders' approval, including the composition of the Board of Directors, the adoption of amendments to our constitutional documents, lending, investments and capital expenditures. This concentration of ownership also may delay, defer or even prevent a change in control of our company and may make some transactions more difficult or impossible without the support of these stockholders. The interests of the Promoters and Promoter Group as the Company's controlling shareholders could conflict with the Company's interests or the interests of its other shareholders. We cannot assure that the Promoters and Promoter Group will act to resolve any conflicts of interest in our Company.

- 27. *In addition to normal remuneration, other benefits and reimbursement of expenses some of our directors (including our Promoter) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.***

Some of our directors (including our Promoters) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our directors would always exercise their rights as shareholders to the benefit and best interest of our Company. For further information, see the chapters titled "*Our Management*" and "*Our Promoters and Promoter Group*" beginning on page 102 and 113 respectively of this Draft Prospectus and the Section titled "*Restated Financial Statements*" beginning on page 120 of this Draft Prospectus.

- 28. *Our actual results could differ from the estimates and projections used to prepare our financial statements.***

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates,

assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

- 29. *There have been instances of non-compliance of the Companies Act, 2013 and non-filing / delays / incorrect filings in the past with certain Regulatory Authorities. If the Regulatory Authorities impose monetary penalties on us or take certain punitive actions against our company in relation to the same, our business, financial condition and results of operations could be adversely affected.***

There have been instances of non-compliance of the Companies Act, 2013 and non-filing / delays / incorrect filings in the past with certain regulatory authorities. There are certain forms which have been subsequently filed with additional fees, as specified by registrar of companies / ministry of corporate affairs.

Except as mentioned in this Draft Prospectus, till date, there has been no penalty levied on the company for such delays / defaults. However, it cannot be assured that even in future no such penalty will be levied. Therefore, if the regulatory authorities impose monetary penalties on us or take certain punitive actions against our company in relation to the same, our business, financial condition and results of operations could be adversely affected.

- 30. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.***

Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition. We operate in an industry, which faces intense competition from established as well as unorganized players. Our competition depends on several factors, which include quality, price and our pace in keeping up with the changing trends. Competition emerges from both organized as well as unorganized sector. If we are unable to effectively compete our revenues and reputation may be adversely affected and we not be able to achieve our long-term strategies.

- 31. *We may need to change our pricing models to compete successfully.***

The competition we face in the sales of our products and services and general economic and business conditions as well as changes in the IT industry standards and landscape, can put pressure on us to change our pricing models. If our competitors offer deep discounts on certain products or services or develop products that the marketplace considers more valuable, we may need to lower prices or offer other favorable terms in order to compete successfully. Any such changes may reduce our sales or margins and could adversely affect our business and operating results. The increased availability and adoption of open-source software may also cause us to change our pricing models in the short term as we transition to increase our presence in the cloud platform.

Some of our competitors may bundle products for promotional purposes or as a long-term pricing strategy or provide guarantees of prices and product implementations. These practices could, over time, significantly constrain the prices that we can charge for some of our products. If we do not adapt our pricing models to reflect changes in customer use of our products or changes in customer demand, our revenues could decrease.

- 32. *We utilize the services of certain consultants for some of our operations. Any deficiency or interruption in their services could adversely affect our business operations and reputation***

We engage third party consultants from time-to-time for certain of our services and development of our products. Our ability to control the manner in which services are provided by third party consultants is limited and we may be liable legally or suffer reputational damage on account of any deficiency of services on part of such consultants. We cannot assure you that we will be successful in continuing to receive uninterrupted and quality services from our third-party consultants. Any disruption or inefficiency in the services provided by our third-party consultants could interrupt our business operations and damage our reputation

- 33. *We are exposed to foreign currency exchange rate fluctuations and exchange control risks, which may adversely affect our results of operations.***

Our operating expenses are denominated substantially in Indian Rupees. However, we receive fees for our services and/ or products in upon conversion of from U.S. Dollar to INR which is dependent upon the existing exchange rate. A significant fluctuation in the Indian Rupee and U.S. Dollar rates and/or other foreign currency exchange rates could therefore have an impact on our results of operations. The exchange rates between the Indian Rupee and these currencies, primarily the U.S. Dollar, have fluctuated in the past and any appreciation or depreciation of the Indian Rupee against these currencies can impact our profitability and results of operations.

- 34. *Product development is a long, expensive and uncertain process and our current expenditure in product development may not provide a sufficient or timely return.***

The development of our products is a costly, complex and time-consuming process, and the investment in their development often involves a long wait until a return is achieved on such an investment. We have made, and will

continue to make, significant investments in product development and related product opportunities. Investments in new technology and processes are inherently speculative. Commercial success depends on many factors, including the degree of innovation of the software products and services developed and effective distribution and marketing. Such expenditure may adversely affect our operating results if they are not offset by corresponding and timely revenue increases. We must continue to dedicate a significant number of resources to our research and development efforts in order to maintain our competitive position. However, significant revenues from new software product and service investments may not be achieved for a number of years, or at all. Moreover, new software products and services may not be profitable, and even if they are profitable, operating margins for new software products and services may not be in line with the margins we have experienced for our existing or historical software products and services.

Moreover, we may determine that certain products or services do not have sufficient potential to warrant the continued allocation of resources and accordingly, we may elect to terminate the development of such products. If we terminate a product in development in which we have invested significant resources, our prospects may suffer, as we will have expended resources on a project that will not provide any return on our investment and also may have missed the opportunity to have allocated those resources to potentially more productive uses. In turn, this may adversely impact our business, operating results and financial condition.

35. *If security measures implemented by us are compromised or if our products and services are perceived as vulnerable, our operations could be materially adversely affected.*

Our products and services store, retrieve and manage our customers' information and data, external data, as well as our own data. Third parties may identify and exploit product and service vulnerabilities, penetrate or bypass our security measures, and gain unauthorized access to our or our customers', partners' and suppliers' software and cloud offerings, networks and systems, any of which could lead to the compromise of personal information or the confidential information or our data or that of our customers. Data may be accessed or modified improperly as a result of customer, partner, employee or supplier error or misconduct and third parties may attempt to fraudulently induce customers, partners, employees or suppliers into disclosing sensitive information such as user names, passwords or other information in order to gain access to our data, our customers', suppliers' or partners' data or our IT systems, customers, suppliers or partners.

High-profile security breaches at companies have increased in recent years, and security industry experts and government officials have warned about the risks of hackers and cyber-attacks targeting IT products and businesses. These risks will increase as we continue to grow our offerings and store and process increasingly large amounts of data, including personal information and our customers' confidential information and data and other external data, especially in customer sectors involving particularly sensitive data such as healthcare, financial services and the government.

Further, as privacy and data protection become more sensitive issues in India, we may also become exposed to potential liabilities. For instance, under the Information Technology Act, 2000, as amended, we are subject to civil liability for wrongful loss or gain arising from any negligence by us in implementing and maintaining reasonable security practices and procedures with respect to sensitive personal data or information on our computer systems, networks, databases and software. India has also implemented privacy laws, including the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011, which impose limitations and restrictions on the collection, use and disclosure of personal information. Any systems failure or security breach or lapse on our part or on the part of our employees that results in the release of user data could harm our reputation and brand and, consequently, our business, in addition to exposing us to potential legal liability.

We could suffer significant damage to our brand and reputation if a cyber-attack or other security incident were to allow unauthorized access to or modification of our customers' or suppliers' data, other external data, or our own data or our IT systems or if the services we provide to our customers were disrupted, or if our products or services are perceived as having security vulnerabilities. Customers could lose confidence in the security and reliability of our products and services, and this could lead to fewer customers using our products and services and result in reduced revenue and earnings. The costs we may incur to address and fix these security incidents would increase our expenses. These types of security incidents could also lead to breach of contracts with customers, lawsuits, regulatory investigations and claims and increased legal liability, including contractual costs related to customer notification and fraud monitoring, all of which could materially adversely affect us.

36. *The proper functioning of our solutions may be impaired by fraudulent or malicious activity, including non-human traffic.*

It is possible that fraudulent or malicious activity, including non-human traffic, could impair the proper functioning of our solutions. For instance, the use of bots or other automated or manual mechanisms could adversely affect the performance of our services and solutions. It may be difficult to detect fraudulent or malicious activity, particularly

because the perpetrators of such activity may have significant resources at their disposal, may frequently change their tactics and may become more sophisticated, requiring us to update, upgrade and improve our processes for detecting and controlling such activity. Such fraudulent or malicious activity could result in negative publicity and reputational harm and require significant additional management time and attention. Further, if we fail to detect or prevent fraudulent or malicious activity in a timely manner, or at all, our customers may experience or perceive a reduced return on their investment or heightened risk associated with the use of our products and services, resulting in refusals to pay, demands for refunds, loss of confidence, withdrawal of future business and potential legal claims.

37. *Majority of our revenues are dependent on few customers and the loss of, or a significant reduction in purchases by such customers could adversely affect our financial performance.*

Our top two customers accounted for approximately 96.35% of our net sales during Financial Year 2020 - 2021. Although, we have long - standing relationships with our customers, there can be no assurance that it may continue to be so in the future. In addition, as a consequence of our reliance on these customers, any adverse change in their financial condition may also have an adverse effect on our cash flows and business prospects. Such concentration of our business on few customers may adversely affect us in case we lose one or more contracts with these customers. Significant revenue from few customers increases the potential volatility of our results and exposes us to risks which may have an adverse effect on financial performance of our business

38. *Our client's proprietary rights may be misappropriated by our employees in violation of applicable confidentiality and non-disclosure agreements and as a result, cause us to breach our contractual obligations in relation to such proprietary rights.*

We can give no assurance that the steps taken by us will be adequate to enforce our clients intellectual property rights or to adequately prevent the disclosure of confidential information by an employee or subcontractor or a subcontractor's employee. If our client's proprietary rights are misappropriated by our employees in violation of any applicable confidentiality agreements or otherwise, our clients may consider us liable for that act and seek damages and compensation from us. In addition, our client contracts may require us to comply with certain security obligations including maintenance of network security, back-up of data, ensuring our network is virus free and ensuring the credentials of our people that work with our clients. We cannot assure you that the existing security measures shall be adequate or we will be able to comply with all such obligations and that we will not incur liability nor have a claim for substantial damages against us.

39. *Increases in wages for IT professionals could reduce our cash flows and profit margins.*

Historically, wage costs in the Indian IT services industry have been significantly lower than wage costs in developed countries for comparable skilled technical personnel, which has been one of India's competitive strengths. However, wage increases in India may prevent us from sustaining this competitive advantage and may negatively affect our profit margins. In the long term, wage increases may make us less competitive unless we are able to continue increasing the efficiency and productivity of our professionals and the quality of our services and the prices we can charge for our products and services. Increases in wages, including an increase in the cash component of our compensation expenses, may reduce our cash flows and our profit margins and have a material adverse effect on our business, financial conditions and results of operations.

40. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

41. *Our financing requirements and the deployment of the net proceeds of the Issue are based on Management estimates and have not been independently appraised.*

Our financing requirements and the deployment of the net proceeds of the Issue are based on management estimates and have not been appraised by any bank or financial institution. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and consequently our financing requirements and the expected deployment of the net proceeds of the Issue may also change.

42. *Industry information included in this draft prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Prospectus. These reports are subject to various limitations and based upon certain assumptions that are

subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Prospectus.

- 43. *Within the parameters as mentioned in the chapter titled “Objects of this Issue” beginning on page 63 of this Draft Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.***

We intend to use entire Issue Proceeds towards meeting the working capital requirement and general corporate purpose. We intend to deploy the Net Issue Proceeds in financial year 2021-22 and next years and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled “Objects of the Issue” beginning on page 63 of this Draft Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled “Objects of the Issue” beginning on page 63 of this Draft Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue.

- 44. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.***

Since the issue size is less than ₹10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

- 45. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “Dividend Policy” beginning on page 119 of this Draft Prospectus.

- 46. *Managing employee benefit pressures in India may prevent us from sustaining our competitive advantage which could adversely affect our business prospects and future financial performance.***

Employee benefits represent a major expense for us and our ability to maintain or reduce such costs is critical for our business operations. We may be required to increase employee compensation levels to remain competitive and manage attrition, and consequently we may need to increase the prices of our products and services. An increase in wages/ salaries paid to our employees may result in a material adverse effect on our profits in the event that we are unable to pass on such increased expenditure to our users or customers without losing their business to our competitors. Likewise, if we are unable to sustain or increase the number of employees as necessary to meet growing demand, our business, financial condition and results of operations could be adversely affected.

47. *Our customers may engage in certain transactions in or with countries or persons that are subject to U.S. and other sanctions.*

U.S. law generally prohibits U.S. persons from directly or indirectly investing or otherwise doing business in or with certain countries that are the subject of comprehensive sanctions and with certain persons or businesses that have been specially designated by the OFAC or other U.S. government agencies. Other governments and international or regional organizations also administer similar economic sanctions. We may provide services to our customers, who in-turn may be doing business with, or located in, countries to which certain OFAC-administered and other sanctions apply, such as Iran. Although we are currently not in violation of any applicable sanctions, if it were determined that transactions in which we participate violate U.S. or other sanctions, we could be subject to U.S. or other penalties, and our reputation and future business prospects in the United States or with U.S. persons, or in other jurisdictions, could be adversely affected. Further, investors in the Equity Shares could incur reputational or other risks as the result of our customers' dealings in or with countries or with persons that are the subject of U.S. sanctions.

48. *Any variation in the utilization of the Net Proceeds of the Issue as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior Shareholders' approval.*

We propose to utilize the Net Proceeds for funding working capital requirements and general corporate purposes. For further details of the proposed objects of the Issue, please see chapter titled "*Objects of the Issue*" beginning on page 63 of this Draft Prospectus. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds from the Issue as disclosed in this Draft Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the Shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders' approval may adversely affect our business or operations. Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition, and may adversely affect our business and results of operations.

49. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter "*Objects of the Issue*" beginning on page 63 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business and development plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

50. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including termination of our contracts, regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and other professionals, agents and / or technicians may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

51. *Our results of operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees, or external agencies like professionals and / or technicians or any other kind of disputes with our employees and these external agencies.*

Our business activities are dependent on availability of skilled and unskilled labour. Generally, we hire our technicians and labour on requirement basis for our business process. Non-availability of technicians and labour at any time or any disputes with them may affect our delivery schedule, which may adversely affect our business and result of operations. We cannot assure you that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock-outs or increased wage demands. Such issues could have adverse effect on our business, and results of operations.

52. *System failures or inadequacy and security breaches in computer systems may adversely affect our business.*

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communication services. We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate our growing customer base and range of services our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security.

Any failure to effectively maintain or improve or upgrade our systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

ISSUE RELATED RISKS

53. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

54. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the BSE Startup segment under SME Platform of BSE Limited (BSE) in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE Startup segment under SME Platform of BSE Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

55. *Any future issuance of Equity Shares may dilute your shareholding and sale of our Equity Shares by our Promoters or other shareholders may adversely affect the trading price of the Equity Shares.*

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

56. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined by fixed price method. This Issue price is based on numerous factors. For further information, see the chapter titled "*Basis for Issue Price*" beginning on page 68 of this Draft prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Changes in revenue or earnings estimates or publication of research reports by analysts;

- Speculation in the press or investment community;
- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

57. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, business operations and financial condition*

As on date of this Draft Prospectus, we have not made any alternate arrangements for meeting our capital requirements for some of the objects of the issue. We meet our capital requirements through, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this offer or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “Objects of the Offer” beginning on page 63 of this Draft Prospectus.

58. *There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder’s ability to sell for the price at which it can sell, equity shares at a particular point in time*

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index- based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

59. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under the Income-tax Act, 1961, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India except any gain realized on the sale of shares on a Stock Exchange held for more than 12 months will not be subject to capital gains tax in India if the Securities Transaction Tax (“STT”) has been paid on the transaction. The STT will be levied on and collected by an Indian Stock Exchange on which equity shares are sold. Any gain realized on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognized Stock Exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of shares on a Stock Exchange held for a period of 12 months or less will be subject to short term capital gains tax. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, Section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October, 2004 shall be available only if the acquisition of share is chargeable to STT under Chapter VII of the Finance (No 2) Act, 2004. In this case, this provision becomes effective, sale shares acquired on or after 1st day of October, 2004 on which STT was not charged will attract tax under provisions of Long-Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April, 2018 if the long-term capital gains exceed ₹1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April, 2018 in excess of ₹1,00,000/- p.a. shall be chargeable at the rate of 10%.

Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

60. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Lead Manager have appointed Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

61. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.*

Our restated financial statements, including the financial statements provided in this Draft Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, refer chapter titled “Presentation of Financial Industry and Market Data” beginning on Page 13 of this Draft Prospectus.

Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited. India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”), which was announced by the MCA, through the press note dated January 22, 2010. These “IFRS based / synchronized Accounting Standards” are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed Company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS)) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

62. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

EXTERNAL RISK FACTORS

63. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

64. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

65. *If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations.*

Having our business operations in multiple jurisdictions, we are subject to varying central and state tax regimes. The applicable categories of taxes and tax rates also vary significantly from jurisdiction to jurisdiction, which may be amended from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each country as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditure incurred. Our business and financial performance may be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business or the regulator enforcing them in any one of those countries may adversely affect our results of operations.

To the extent that we are entitled to certain tax benefits in India which are available for a limited period of time, our profitability will be affected if such benefits will no longer be available, or are reduced or withdrawn prematurely or if we are subject to any dispute with the tax authorities in relation to these benefits or in the event we are unable to comply with the conditions required to be complied with in order to avail ourselves of each of these benefits. Please see "Statement of Possible Tax Benefits" beginning on page 72 of this Draft Prospectus for details in relation to possible tax benefits available to our Company. In the event that any adverse development in the law or the manner of its implementation affects our ability to benefit from these tax incentives, our business, results of operations, financial condition and prospects may be adversely affected.

Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government of India that affect our industry include income tax, goods and services tax and other taxes, duties or surcharges introduced from time to time. The tax scheme in India is extensive and subject to change from time to time and any adverse changes in any of the taxes levied by the Government of India may adversely affect our competitive position and profitability. We cannot assure you that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the countries in which we operate may materially and adversely affect our business, results of operations and financial condition. In addition, we may have to incur expenditure to comply with the requirements of any new regulations, which may also materially harm our results of operations. We are also subject to these risks in all our overseas operations depending on each specific country. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities. As a result, any such changes or interpretations may adversely affect our business, financial condition and financial performance. Further, changes in capital gains tax or tax on capital market transactions or sale of shares may affect investor returns.

66. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

67. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

68. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to chapter titled “Key Industry Regulations” beginning on page 92 of this Draft Prospectus for details of the laws currently applicable to us. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge currently being collected by the central and state governments. The GST is expected to increase tax incidence and administrative compliance. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences.

In the absence of any precedents on the subject, the application of these provisions is uncertain. The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

69. *Any downgrading of India’s sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

70. *The ability of Indian companies to raise foreign capital may be constrained by Indian law.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution” on page 31. Given the nature of our business, we may have to revise our funding requirements and deployment on account of a variety of factors such as our financial condition, business strategy and external factors such as market conditions, competitive environment and interest or exchange rate fluctuations and other external factors which may not be within the control of our management. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in the Issue. To the extent our Company is unable to utilise any portion of the Net Proceeds towards the aforementioned Objects, per the estimated scheduled of deployment specified above, our Company shall deploy the Net Proceeds in subsequent Fiscals towards the aforementioned Objects.

SECTION V – ABOUT THE COMPANY

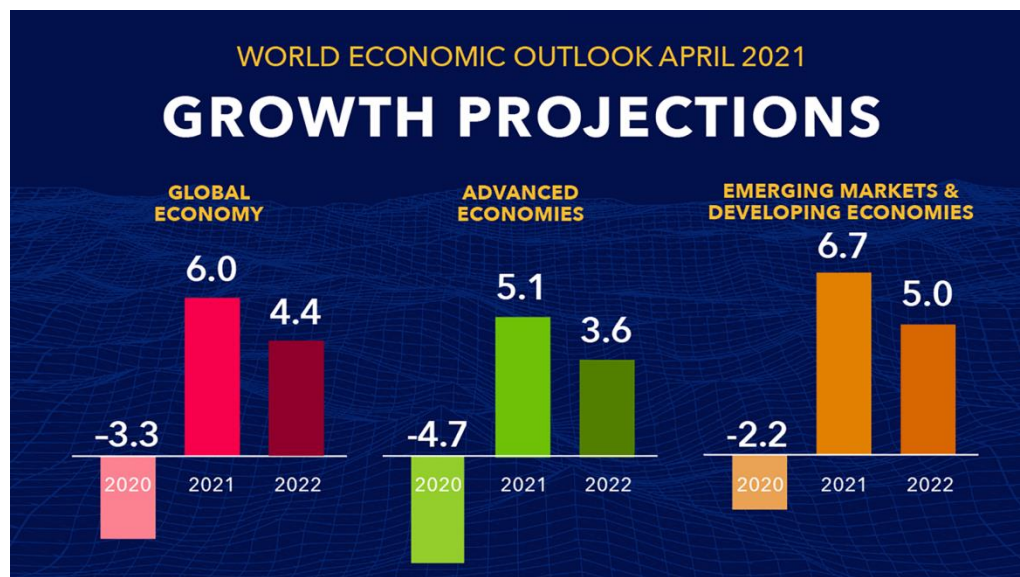

INDUSTRY OVERVIEW

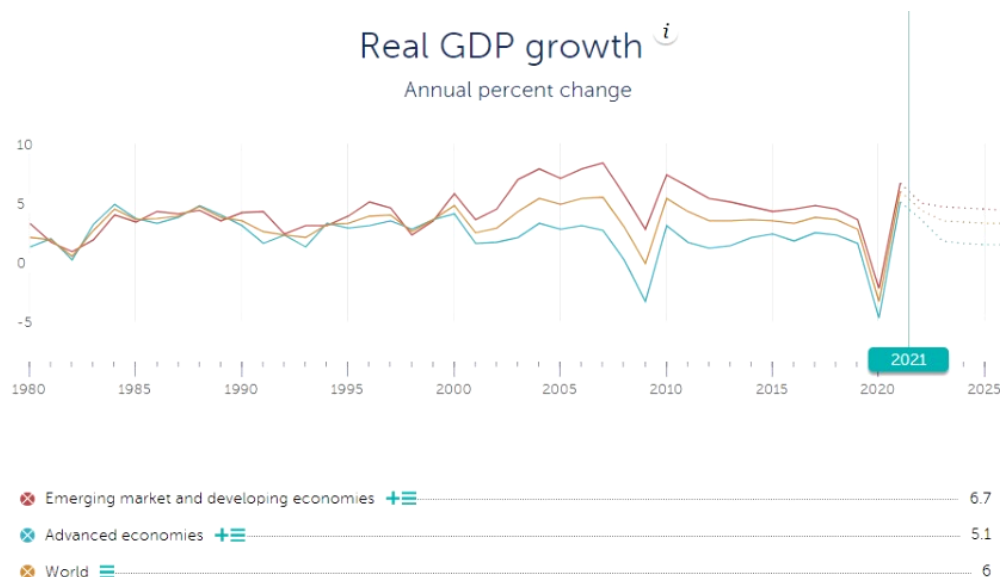

The information in this chapter has been extracted from the websites of and publicly available documents from various sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with this Issue has independently verified the information provided in this chapter. Industry sources and publications, referred to in this chapter, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

GLOBAL ECONOMIC OVERVIEW

One year into the COVID-19 pandemic, the accumulating human toll continues to raise concerns, even as growing vaccine coverage lifts sentiment. High uncertainty surrounds the global economic outlook, primarily related to the path of the pandemic. The contraction of activity in 2020 was unprecedented in living memory in its speed and synchronized nature.

After an estimated contraction of –3.3 percent in 2020, the global economy is projected to grow at 6 percent in 2021, moderating to 4.4 percent in 2022. The contraction for 2020 is 1.1 percentage points smaller than projected in the October 2020 World Economic Outlook (WEO), reflecting the higher-than-expected growth outturns in the second half of the year for most regions after lockdowns were eased and as economies adapted to new ways of working. The projections for 2021 and 2022 are 0.8 percentage point and 0.2 percentage point stronger than in the October 2020 WEO, reflecting additional fiscal support in a few large economies and the anticipated vaccine-powered recovery in the second half of the year. Global growth is expected to moderate to 3.3 percent over the medium term—reflecting projected damage to supply potential and forces that predate the pandemic, including aging-related slower labor force growth in advanced economies and some emerging market economies. Thanks to unprecedented policy response, the COVID-19 recession is likely to leave smaller scars than the 2008 global financial crisis. However, emerging market economies and low-income developing countries have been hit harder and are expected to suffer more significant medium-term losses

INDIAN ECONOMIC OVERVIEW

The Indian economy was negatively impacted by an unprecedented health crisis in 2020-21 with the highly contagious corona virus (Covid-19) spreading across the country. In response to the pandemic, Government has taken several proactive preventive and mitigating measures starting with progressive tightening of international travel, issue of advisories for the members of the public, setting up quarantine facilities, contact tracing of persons infected by the virus and various social distancing measures. Government imposed a strict 21 days nationwide lockdown from 25th March, 2020, under the Disaster Management Act, 2005, with subsequent extensions and relaxations, to contain the spread of Covid-19 while ramping up the health infrastructure in the country. The lockdown measures, imposed to contain the spread of Covid-19 pandemic in India, ubiquitously affected employment, business, trade, manufacturing, and services activities. The real Gross Domestic Product (GDP) growth is projected to contract by 7.7 percent in 2020-21 as compared to a growth of 4.2 percent in 2019-20. GDP growth, however, is expected to rebound strongly in 2021-22 owing to the reform measures undertaken by the Government.

The growth of Gross Value Added (GVA) at constant (2011-12) basic prices is estimated to contract by 7.2 percent in 2020-21, as compared to a growth of 3.9 percent achieved in 2019-20. Positive growth in real GVA in agriculture & allied sectors at 3.4 percent in 2020-21 against 4.0 percent in PE of 2019-20 indicates resilience of rural economic

activity to the Covid-19 pandemic. From the demand side, private consumption expenditure is estimated to contract at 9.5 percent in 2020-21 as against a growth of 5.3 percent in 2019-20 and fixed investment is estimated to decline by 14.5 percent in 2020-21 as against 2.8 percent in 2019-20. Government consumption final expenditure is estimated to grow at 5.8 percent in 2020-21 as against 11.8 percent in 2019-20. Exports and imports of goods and services are estimated to contract at 8.3 percent and 20.5 percent (at constant prices) respectively in 2020-21.

Acquire new clients and deepen key account relationships

Over the years we have developed long standing relationships with our customers. We devote significant attention to being able to understand the behavior, preferences and trends of our customers through research and a consultation process. We believe that this gives us a distinct perspective that we bring to our engagements.

We are focused on continuing to expand our relationships with existing customers by helping them solve new problems and become more engaging, responsive and efficient. We have a demonstrated track record of expanding our work with customers after an initial engagement. As we have done previously, we aim to sustain the annual revenue contribution of a customer in subsequent years after the year of customer acquisition. Expansion of our relationships with existing active customers will remain a key strategy going forward as we continue to leverage our domain expertise and knowledge of emerging technology trends in order to drive incremental growth for our business.

We believe that we continue to have opportunities to add new customers to our portfolio. Leveraging our creative and engineering capabilities, we work with our customers to create complete solutions, often involving custom, task-oriented user interfaces, integration and continuous delivery pipelines. We often use a blend of open source, commercial and custom technologies in order to optimize for cost, flexibility, sophistication and long-term sustainability requirements unique to our customers' environments. Where appropriate, we also work with the cloud delivery providers with respect to both their infrastructure-as-a-service and SaaS offerings.

Our customers often choose us for creation of their digital roadmap and proof-of-concept of their digital journey due to our specialization in disruptive technologies and digital focus. Successful execution of these high-value assignments leads to larger implementation projects and long-term relationships.

Diversify our Business Portfolio

Computer hardware, software, and internet, and broadband infrastructure, for example, are crucial determinants of growth in advanced economies. Based on the continuous upward growth of technology and modulation of the needs of the clients, we intend to expand further indifferent sectors with innovative ideas. We have traditionally focused on enterprises that are technology- and information-centric, where we believe our software development expertise is valued in the same vertical such as Artificial Intelligence, Big Data, Virtual Reality, etc. We now intend to diversify the business activity by inclusion of new division of resale of electronic gadgets, applications, appliances and hardware. We believe that expanding our business in the same industry at different vertical in the process chain will enable to deliver our services efficiently. We plan to continue enhancing our expertise in different verticals by recruiting IT professionals with industry expertise.

Enhancing existing technology and thrive to make people centric policies and practices

IT sector being the most revolutionising sector, it directly or indirectly affects other sectors who are dependent on internet and technology. In the digital era, innovation, entrepreneurial dynamism, and information and ICT production will drive India's competitive edge. We intend to come up with innovative techniques that enables to create innovative trends to retain the client by providing services that are user friendly and develop systems according to the needs of the people in the changing world. Adopting people centric policies and practices not only does it enable us to retain clients by creating efficiency in their business activities but it also helps in creating a different software model which becomes beneficial to our business profile.

A spike in consumer demand for flexible pay-as-you-go models coupled with large IT companies integrating costly cloud-based tools with enterprise systems has brought the cloud to the mass market. Ambient experience, exponential intelligence, and quantum are the nascent macro forces we currently see on the distant horizon.

Increase in Productivity and Efficiency

Automation offers the potential to improve productivity by introducing robots and AI into the workplace. These tools will help employees complete more tasks and leverage human capabilities. Automated processes and digital assistants can also facilitate worker productivity, bringing substantial benefits to the macro economy. In addition to the employment boost provided by the IT and related industry, associated industry productivity has grown as well.

Not only do these innovations help businesses assimilate into the digital ecosystem, but small businesses' willingness to invest in these capabilities and other IT-related services exposes them to better local market opportunities and profit margins.

Decreasing transaction costs have also levelled the playing field by significantly lowering barriers to entry and allowing local and regional producers to operate on a global scale, which is critical to creating the sharing economy. Technologies help to democratize production, allowing small- and medium-sized producers access to previously unavailable processes and know-how. We believe that investing in new hardware and software tools and entering into resale markets of hardware shall make it easier than ever to turn a creative idea into a functional prototype. Innovative software and integration tools have further simplified the creation of complex parts. Digital enablement has thus had a direct impact on reducing inefficiencies in transaction costs and information asymmetries inherent in traditional vertical value chains.

7. **Agile Cycle:** Steps 3-6 may be repeated as a part of our Agile/SCRUM implementation methodology for product creation
8. **Deployment & Move to Maintenance:** Once the UAT is complete, the project exits the Agile/SCRUM development process and is deployed into Release mode

Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six working days during this phase.

Phase III:

The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.
